

AJ-UARTBRIDGE

Ajax

Features

The AJ-UARTBRIDGE device is an integration module for Ajax devices (motion detectors, magnetic contacts, remote controls etc.) with smarthome systems via UART interface. It is possible to add up to 85 Ajax devices wirelessly to this module thanks to the radio protocol Jeweller 868 MHz. For communication with the third party panel, communication via UART interface is used, through which the information from the Ajax devices will be sent to the system.

Communication between the AJ-UARTBRIDGE module and Ajax devices has a range of up to 2 kilometers in open field conditions without obstacles.

Specifications

Brand	Ajax
Module inputs	Up to 85 Ajax devices
Transmission distance	Up to 2 km in open space
Transmission frequency	868 MHz Jeweller
Compatibility	MotionProtect, MotionProtect Plus, CombiProtect, DoorProtect, FireProtect, FireProtect Plus, LeaksProtect, SpaceControl and GlassProtect
Power	DC 5 V
Temp. operation	-10° C ~ +40° C
Dimensions	64 (H) x 55 (W) x 13 (D)mm
