TALK PANEL

Model:

PC-3000R LM

Index:

C41A242

EAN:

5902768850970

## Description:

A series of talk panels designed for multi-family buildings with low and high floors, compatible with the following electronics: digital CC-2000 and analog-digital CC-1000/1500

## Panel features:

- two ways to open the door quickly and easily: from the control panel keyboard, using a 4-digit, individual entry code, using an RFID proximity tag placed under the list of tenants in the PC-3000R LM panel,
- confirmation of the use of the code and opening of the gate with an audible signal in the apartment,
- a conversation panel made of acid-resistant steel, highly resistant to mechanical damage and atmospheric factors, closed and secured with special screws,
- solid, backlit, vandal-proof and waterproof metal numeric keypad,
- large, 4-position digital display,
- possibility of creating multi-entrance configurations in the case of a large property with several entrances (up to 4 master panels and "n" slave ones),
- one type of panel for both parent and child work,
- access to programming secured with an administrator code,
- the panel and electronics are powered by one 12.5V/1.2A AC power supply.

## Technical specifications:

## Talk panel

Supply voltage	12.5VAC/1.2A
Max. number of tenants	255
Housing material	Acid-resistant steel
Installation method	Concealed
Proximity reader	Yes
Encryptor	Yes
Protective roof	Yes
Dimensions (H x W x D)	225x168x35mm
Package dimensions (H x W x D)	320x230x80mm
Gross weight of package	1900g
Package type	Cardboard
