# BRAVO PSTN
PSTN Communication Module

Description

BRAVO PSTN is a communication module designed for operation in BRAVO wireless intruder alarm systems.
The module is mounted into BRAVO panel via serial interface connection. The BRAVO PSTN module sends messages for events to 2 telephone numbers - to monitoring station (CID or SIA communication protocols) or directly to User (User communication protocol - audio call on Alarm only).
The module can be programmed via ProsTE software or AjaxWEB user web interface.

Technical and Functional Specifications
